SOCIAL APP / VISUAL SYSTEM

A sharp identity.
A monochrome canvas.

Frontend handoff • Electric minimalism with a controlled cybernetic edge.

HYPERLIME
#B7FF38

SIGNATURE ACCENT
Crisp · vivid · high-impact

Use like a signal, not wallpaper.

01 / Core palette

HYPERLIME **#B7FF38** Signature accent	TRUE BLACK **#000000** Primary dark canvas	CARBON **#111111** Secondary surfaces
WHITE **#FFFFFF** Primary text	SIGNAL GREY **#A3A3A3** Secondary text	GRAPHITE **#303030** Borders / dividers

Balance: keep the UI mostly black, white, and neutral grey. Let posts and creator content bring their own colour. Use Hyperlime for high-value moments, not every icon or card.

02 / Typography

ROLE	FONT	STYLE	USE
Display / brand	**Oxanium**	600–700 · 32–48 px	Short hero headings, campaign titles
Main UI	**Space Grotesk**	400–600 · 14–18 px	Navigation, posts, forms, profiles
Metadata	**Space Mono**	400–700 · 11–13 px	Timestamps, counters, tags

Type rule: Oxanium gives display text its futuristic edge; Space Grotesk handles readability; Space Mono is for small, purposeful labels. Use the angular display style sparingly so the app feels social, not like a gaming dashboard.

FRONTEND HANDOFF

Build rules, not just screens.

Apply the tokens consistently across feed, profile, discovery, notifications, comments, and settings.

03 / Theme tokens

TOKEN	DARK THEME	LIGHT THEME	USAGE
Background	#000000	#FAFCFA	App canvas
Surface	#111111	#FFFFFF	Cards, menus, sheets
Raised surface	#191919	#F1F4EF	Dialogs, dropdowns
Primary text	#FFFFFF	#171B18	Headings and body
Secondary text	#A3A3A3	#626862	Metadata / hints
Border	#303030	#E1E5DF	Dividers / outlines
Brand accent	#B7FF38	#B7FF38	Logo, key actions, selected accents
Light accent text	#B7FF38	#537A00	Small text/icons when contrast requires it

04 / Component rules

COMPONENT	STYLE	RULE
Primary button	Hyperlime fill + black label	Bold label; minimum 44 px high; 10 px radius
Secondary button	Transparent + white border/text	For lower-priority actions
Navigation	White/grey by default	Lime marker/icon/label for selected state
Cards	Carbon surface + graphite border	Subtle shadows; content-first
Badges	Neutral by default	Lime only for key/active states

05 / Design principles

- **Accent restraint:** Hyperlime is for primary actions, selected states, key reactions, and brand marks.
- **Contrast:** use black text on #B7FF38 buttons. Test controls in both themes.
- **Light theme:** use #537A00 for small text/icons on light surfaces when the bright accent lacks contrast.
- **Motion:** quick, purposeful transitions (120–200 ms). Avoid constant glow, pulsing, and excessive gradients.
- **Accessibility:** never communicate status through colour alone; pair it with text or an icon. Support visible focus and reduced motion.
- **Content first:** posts, photos, videos, and creator artwork should remain visually dominant.

06 / CSS starter tokens

```
/* Signature UI system — Hyperlime #B7FF38 */
:root {
--brand-accent: #B7FF38;
--brand-accent-hover: #A6ED27;
--brand-accent-pressed: #94D91F;
--bg: #000000; --surface: #111111; --surface-raised: #191919;
--text-primary: #FFFFFF; --text-secondary: #A3A3A3; --border: #303030;
--font-display: "Oxanium", sans-serif;
--font-ui: "Space Grotesk", sans-serif;
--font-meta: "Space Mono", monospace;
}
[data-theme="light"] {
--bg: #FAFCFA; --surface: #FFFFFF; --surface-raised: #F1F4EF;
--text-primary: #171B18; --text-secondary: #626862;
--border: #E1E5DF; --brand-accent-text: #537A00;
}
```

Implementation note: load the font families from your approved font provider or self-hosted assets. Validate contrast and states in the actual frontend before release.
